

## Specification sheet

# QSX15-G8

TA Luft Compliant

### Description

The QSX15-Series is the first heavy-duty diesel with 24-valve dual overhead camshaft technology. Yet it has an impressive 30% fewer parts than comparable diesels and a utilised design, which eliminates external lube, coolant and fuel lines leading to higher reliability for such a high power output.

The 15 litre, six-cylinder QSX15 engine is ideally suited to both open and containerised applications in static or portable genset equipment. It can be matched to meet specific duty cycle and operating conditions of any genset.

This equipment has been built to comply with CE certification requirement subject to EU RoHS exclusion per EU 2011/65.

This engine has been designed in facilities certified to ISO9001 and manufactured in facilities certified to ISO9001 or ISO9002.

### Features

**Holset HX82 Turbocharging** - Wastegated design optimizes operation across the torque curve with improved response.

**Integrated Block Design** - Integrated fluid circuits replace hoses and eliminate potential leaks.

**High-Pressure Fuel Injection** - Capable of over 1,900 bar (28,000 psi) for cleaner, more fuel-efficient combustion.

**24-Valve Cylinder Head** – Four valves per cylinder for increased power with faster response at every rpm.

**Coolpac Integrated Design** - Products are supplied complete with cooling package and air cleaner kit for a complete power package. Each component has been specifically developed and rigorously tested for G-Drive products, ensuring high performance, durability and reliability.

**Service and Support** - G-Drive products are backed by an uncompromising level of technical support and after sales service, delivered through a world class service network.
