The next generation of Roots pumps. Intelligent, high-performance Roots pumps for low and medium vacuum applications.

Perfectly adjustable Roots pumps from the innovative HiLobe series offer a wide

range of pumping speeds and applications. With their individual speed control, they can be adapted perfectly to customer-specific requirements. In order to operate, Roots pumps require a suitable backing pump for the application in hand, which is adjusted to the gas flow. Installation costs are

reduced due to the flexible mounting position.

High performance The superior drive concept of the HiLobe pumps can shorten

pump-down times by about 20% compared to conventional Roots pumps, especially for rapid evacuations. The pumps are

hermetically sealed from the atmosphere and offer a maximum integral leak rate of 1·10⁻⁶ Pa m³/s.

Low operating costsThe HiLobe series offers the lowest operating costs with the

most uptime. This is achieved by using only motors with very high energy efficiency, even at different operating ranges, and optimized rotor geometries. The sealing concept makes the use of sealing gas superfluous in many cases, which reduces prograting costs even more. Cost intensive water cooling is no

operating costs even more. Cost-intensive water cooling is no longer necessary due to the sophisticated air cooling concept.

Intelligent The intelligent interface technology of the HiLobe ensures optimal adjustment and condition monitoring of processes.

Intelligent condition monitoring also guarantees a long service

life and maximum operational reliability.

Applications

- Electron beam welding
- Leak detection
- Metallurgy
- Coating
- Freeze drying
- Space simulation
- Vacuum packaging
- Battery production
- Vacuum drying, including transformer drying
- Insulation vacuum
- Distillation

Customer benefits

- Pumping speed range, depending on version, from 260 –6,200 m³/h due to variable speed control
- Extremely short pump-down times due to superior, next-generation drive concept
- Intelligent interface technology allows process adjustment and condition monitoring (Industry 4.0)
- Hermetically sealed pump with leak rate of < 1·10⁻⁶ Pa m³/s since outward dynamic seals are eliminated
- Low operating costs due to state-of-the-art air cooling up to +40 °C and motor technology (surpasses the IE4 standard for asynchronous motors)
- Long service life and maximum operational reliability thanks to intelligent condition monitoring and innovative rotor/motor concept.

We promote sustainable solutions

Energy-saving and durable

Integrating modern HiLobe Roots pumps is a sustainable and environmentally friendly way to increase the efficiency of pumping stations. In addition to a long service life and high operational reliability, these pumps feature motors that already meet the future IE4 energy efficiency class. This also applies for a variety of operational areas (such as load lock, ultimate pressure). Thus they significantly contribute to reducing operating costs and energy use in particular. Thanks to the sophisticated ventilation concept of the HiLobe, complex water cooling can also be dispensed with, thereby saving resources and reducing your operating costs.

Sustainability and social responsibility

Our CombiLine pumping stations are all optimally adapted to your process by our experts to find the most cost-effective and efficient solution for your application.

When procuring the various components and manufacturing our pumps, Pfeiffer Vacuum places the utmost importance on fair business practices, an employee-oriented human resources policy, economical use of natural resources, as well as climate and environmental protection.

VACUUM SOLUTIONS FROM A SINGLE SOURCE

Pfeiffer Vacuum stands for innovative and custom vacuum solutions worldwide, technological perfection, competent advice and reliable service.

COMPLETE RANGE OF PRODUCTS

From a single component to complex systems:

We are the only supplier of vacuum technology that provides a complete product portfolio.

COMPETENCE IN THEORY AND PRACTICE

Benefit from our know-how and our portfolio of training opportunities! We support you with your plant layout and provide first-class on-site service worldwide.

Are you looking for a perfect vacuum solution? Please contact us:
